

# Fundraiser 360° by Dynamic Data Concepts

Based on fifteen years of experience and feedback from thousands of users across the globe, Fundraiser 360° is the complete donor management solution for nonprofit organizations who want simplicity accuracy, and control in their data management tools.

The logo graphic consists of several concentric, semi-circular arcs of small blue dots, creating a sense of motion and a 360-degree rotation. The dots are arranged in a way that suggests a spiral or a path that curves around.
